

## Electrical Safety - Energized Electrical Work Training

- **Training Requirements:**

Energized electrical work, (work on circuits >50V) is controlled by an energized electrical hazardous work permit.

**Training on the energized electrical hazardous work permit is required before energized electrical work is performed**

- **FY 21-22 Update**

Training on the energized electrical hazardous work permit was conducted.

**A formal rollout of the hazardous work permit system is scheduled for CY 2023.**
