Domestic light chemical gloves:
**Purpose:** To protect hands against hazardous domestic and light industrial chemicals.
*When should I use it?* When working with cleaning agents such as bleach, ammonia, petroleum solvents, hot water etc.

Polka Dot glove
**Purpose:** To protect hands against light abrasion during general operations.
*When should I use it?* When engaged in general operations, for example, housekeeping and inspecting (switched-off) equipment.

Mechanix Gloves
**Purpose:** To prevent snagging on rotating equipment, for example, engines, compressors and generator.
*When should I use it?* When working with machinery. When involved in low abrasion activities.

Laboratory Glove
**Purpose:** Protects against light chemicals.
*When should I use it?* When engaged in lab activities with light chemicals.

Heavy Industrial Chemical gloves
**Purpose:** To protect hands against hazardous industrial chemicals. Heat resistant.
*When should I use it?* Working with very harsh industrial chemicals, for example, drilling caustics, acids...

Domestic light chemical glove
**Purpose:** To protect hands against hazardous domestic and light industrial chemicals.
*When should I use it?* When working with cleaning agents such as bleach, ammonia, petroleum solvents, hot water etc.

Nitra Safe Gloves
**Purpose:** Protects hands against severe abrasion, cuts and punctures.
*When should I use it?* When handling castings, cores, oily sheet metal, glass, slings, pallets and metal fabrication.

Junk Yard Dog
**Purpose:** Leather palm provides good abrasion/puncture resistance, added durability and improved grip in wet and oily applications.
*When should I use it?* If you are handling slings, drill collars, wooden pallets etc.

Driver Gloves
**Purpose:** To protect the whole hand against medium abrasion/punctures/cuts.
*When should I use it?* When working with machinery. When involved in medium abrasion activities.

Stainless Steel Mesh Gauntlet
**Purpose:** To protect chefs/kitchen personnel against cuts whilst preparing food in the galley.
*When should I use it?* Cutting meat, fish, slicing vegetables, ... in the galley.

Welders Gloves
**Purpose:** To prevent burns from welding slag to the welder's hands.
*When should I use it?* When welding.

Rigger Gloves
**Purpose:** To protect the palm and fingers, when handling very abrasive materials.
*When should I use it?* If you are handling slings, drill collars, wooden pallets etc.
