

Hearing Conservation

- **Program Description:**
Cal/OSHA's Hearing Conservation standard defines requirements to protect employees against occupational hearing loss.

Areas that produce significant noise levels are identified and labeled.

Employees who work in high noise areas are enrolled in a hearing conservation program that includes annual training on the proper use of hearing protection, and annual audiometric (hearing) tests.
- **FY 21-22 Update:**
The program was reviewed In FY 21-22
