

# How to Access Safety Data Sheets (SDS)

The RSS SDS will replace MSDSOnline as the primary source for managing and accessing all Safety Data Sheets (SDS) at your organization.

## Accessing Safety Data Sheets (SDS)

1. Log in to the RSS SDS page directly at <https://app.riskandsafety.com/sds>
2. The page displays a list of all available SDS. To find an SDS for a specific chemical, enter the chemical's Name, Product Number, or Vendor in the search field
3. Select the desired SDS from the list
4. You can either select the download icon to save the SDS file to your computer or select the print icon to print a physical copy of the SDS

To request the addition of a missing SDS to the database, please submit a ticket to our Service Desk at [servicedesk@riskandsafety.com](mailto:servicedesk@riskandsafety.com) with the SDS as an attachment.

## Safety Data Sheets (SDS) in Your Inventory

You can also access the SDS page while reviewing the chemicals in your online Chemical inventory.

1. Log in to <https://app.riskandsafety.com/>
2. Select **Apps** in the top menu, and choose **Chemicals**
3. From the Chemicals homepage, select **Search Chemicals**
4. Enter the chemical in the search field
5. Select the chemical from the results
6. Scroll down to the "Related SDS" section and "Attachments"
  - a. There may be SDS sheets that are already present in "Attachments"
  - b. If there are no attachments, select **Safety Data Sheets and additional resources** under "Related SDS" to be directed to the SDS page
  - c. Any vendor-specific SDS on file will be shown further below under the "Substances" list
